A1000 IP54 Solutions High Performance in Harshest Environment

A1000 IP54 solutions make the power and performance of A1000 drives easily available for machines in wet, dirty or dusty ambient conditions. Decentralized installation, highly efficient operation of any motor, and integrated PLC functionality reduce system cost while the built in Safe Torque Off (STO) function increases machine safety.

IP54 Ready

A1000 IP54 Ready is flange mounted with it's heat sink out the back bringing heat loss out of the panel. It is the optimal solution for small sized custom panels with high degree of ingress protection.

- ▶ A1000 with IP54 sealed mounting flange
- ▶ Easy out of the box installation of single or multiple drives in an IP54 panel
- ▶ Heatsink out of the back mounting brings main heat loss out of the panel and allows smaller panel dimensions
- ▶ Perfect for small panels without active cooling or ventilation

IP54 Wall Mount

A1000 IP54 Wall Mount drives are made for decentralized installation. Equipped with a built in EMC filter, clear text LCD display in 8 languages and an optional mains switch this drive can be installed and set up in shortest time.

- ▶ A1000 in IP54 compact panel
- ▶ EMC filter built in, EN61800-3 Class C1, IT grid filter optional
- ▶ Lockable mains switch optional
- ▶ No extra panel, simple installation to machines or rooms
- ▶ Space for additional components allows customization

Applications

HVAC

Pump

Compressor

Fan

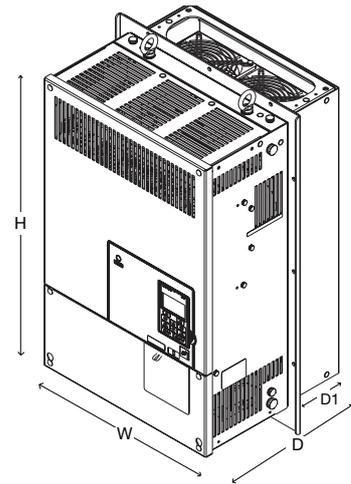

Standard Specifications

A1000 IP54 Ready

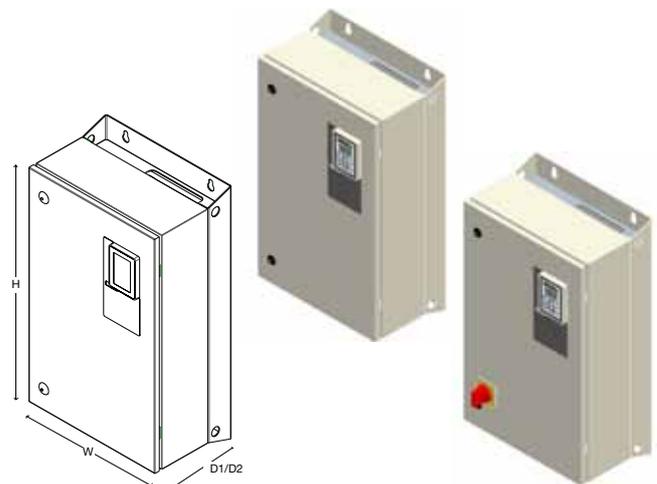

CIMR-AC	Current (AMP)		Power (kW)		Dimensions in mm				Weight
	HD	ND	HD	ND	W	H	D	D1	kg
4A0044WAA	39	44	18.5	22	275	402	197	75.6	11

4A0139WAA	112	139	55	75	370	565	285	110	41
4A0165WAA	150	165	75	90	370	565	285	110	42

- ▶ **8 Multi functional digital inputs**
 Sinking/Sourcing mode selectable
 External power supply usable (24 VDC)
- ▶ **Multi functional pulse train input (up to 32 kHz)**
 Easy synchronizing with other drives
- ▶ **3 Multi functional analog inputs**
 (Voltage / Current / PTC selectable)
- ▶ **Fault output**
 CO relay output (N. O. and N. C.)
 250 VAC 10 mA ... 1A
- ▶ **Functional safety**
 2 Channel Safe Torque Off (EN ISO 13849-1, PLd)
- ▶ **3 Multi functional digital outputs**
 Relay (N. O. or N. C programmable)
- ▶ **Multi functional pulse train output up to 32 kHz**
 Easy synchronizing with other drives
- ▶ **2 Multi functional analog output**
 (Voltage / Current selectable)
- ▶ **External Device Monitor (EDM)**
 Status for Safe Torque Off function
